Dear Marie Read:

**Re: Groundwater Monitoring Proposal
Site 5102, Plan 2605X Block 6 Lots 28 to 35, Barons**

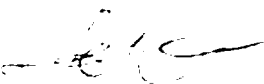

Thank you for the Groundwater Monitoring Proposal dated December 9, 2008, received on December 9, 2008, which was prepared by your consultant, Hasegawa Engineering. We have completed our review of the proposal.

Based on your consultant's recommendation, the proposed engineering fees have been accepted for funding under the grant. **If you are in agreement, you may authorize your consultant to proceed with the work on a time and material basis for \$7,025.21, including GST.** Please be advised that this funding approval has been adjusted to include the 5% throughput charge on third party disbursements, as well as the 5% administration charge on engineering fees. Invoices submitted should be based on actual costs with backup for disbursements attached. Billing markups on engineering fees and disbursements must be in accordance with Schedule A.

As per Clause 2(c) of your Conditional Grant Agreement, your Grant is being increased to \$20,000.00 to accommodate this phase of the project.

The report with recommendations for further work should be submitted by February, 13, 2009. Should you have any questions about your file or the program in general, please contact Steve Hoare at (780) 415-8665 or toll-free at 1-866-833-3300.

Yours truly,

Joe Petrie, P. Geol., R.E.T.
Program Manager
