Dear Mr. Mersereau.

Re: Barons Turbo Bulk Station

I have reviewed the Seacor Environmental Engineering November 1996 reports. I accept the remedial recommendations outlined in Section 3 0 of the Remedial Action Plan report. Please provide a consultant's report confirming the laboratory soil and vapour testing results of the side walls and base of the excavation. Also, concerning the risk management monitoring plan for the offsite monitoring wells, please confirm that the results of the risk management monitoring will be provided for my review.

Thank you for the site investigation work completed at this site. Please call me at 382-4255 if you require further discussion.

Yours truly,

Don Wyrstock
