Notice of Intent to Designate a Provincial Historic Resource

(Historical Resource Act)

File: Des. 913

Notice is hereby given that sixty days from the date of service of this Notice and its publication in Alberta Gazette, the Minister of Culture and Community Spirit intends to make an Order that the site known as the:

Inglewood Telephone Building, together with the land legally described as:

Plan A3, Block 6, Lot 6

and municipally located at 1311 – 9 Avenue SE in the City of Calgary, Alberta be designated as a **Provincial Historic Resource** under Section 20 of the Historical Resources Act, RSA 2000 cH-9.

The reasons for the designation are as follows: The heritage value of the Inglewood Telephone Building lies in its association with the development of telephone services in Alberta's urban areas. It is also significant architecturally as an example of an

innovative design created specifically to meet the needs of automated telephone exchange equipment.

Telephone services were introduced to Calgary in 1885 when Colonel James Walker installed a telephone line connecting his office with his lumberyard a few miles away. In 1887, recognizing the necessity and potential of this communications technology, the City of Calgary invited the Bell Telephone Company to develop a city-wide telephone system. Bell constructed a central, manually-operated telephone exchange and, by 1900, had expanded service across the city. Bell, which also operated telephone systems in other urban areas in the province, was not interested in providing service to rural regions, believing them to be unprofitable. Consequently, in 1906, the Government of Alberta began to build telephone lines into rural areas. In 1908, the government purchased Bell's infrastructure to form the core of what would be known as Alberta Government Telephones (AGT), which had the mandate to expand service to rural areas and improve service in existing urban systems. Due to Calgary's burgeoning population and the rapidly growing demand for telephone service, the existing central exchange had reached the limits of its capacity. In 1909, the government built an automated sub-station in the Inglewood neighbourhood to address this service deficiency. Originally equipped to manage 300 new telephone lines, the new station quickly reached its capacity. The exchange was physically enlarged with an addition at the rear of the original structure, creating space for more equipment and expanding the sub-station's capacity to 1,000 lines. The Inglewood Telephone Exchange Building remained in active use as a telephone exchange until 1957, when it was replaced by more modern facilities.

The Inglewood Telephone Building was built to house new automated telephone exchange equipment. This sensitive equipment required climate-controlled facilities in order to function properly. Provincial Architect Allan M. Jeffers employed a unique double-wall design in an effort to achieve this goal. An exterior brick and masonry shell encloses a concrete and terra cotta brick structure, which defines the interior spaces. Between the two walls is an empty space of approximately 46cm (18") to 61cm (24"). This space was intended to provide passive insulation during hot weather and, by being a conduit for warmed air, serve as a radiant heat source during cold weather. It was hoped that these heating and cooling properties would provide for a constant temperature for the telephone equipment. In order to maintain a uniform temperature and because a human presence was deemed unnecessary, windows were not included in the original building. Unfortunately, the equipment required frequent service visits to be reset manually. A few years after construction, window openings were made in the walls and a slightly larger rear extension was constructed. The large, open interior spaces, used to house banks of telephone equipment, reflect the building's original industrial and public utility purpose. While the unique design did not function as expected, this structure still represents an innovative attempt to create functional buildings around the needs of developing communications technology.

It is therefore considered that the preservation and protection of the resource is in the public interest.

Notice is hereby given that sixty days from the date of service of this Notice and its publication in Alberta Gazette, the Minister of Culture and Community Spirit intends to make an Order that the site known as the:

Vilna Pool Hall and Barbershop, together with the land legally described as:

Plan 1022CL, Block 1, Lot 7 Excepting thereout all mines and minerals.

and municipally located at 5028 – 50 Street in the Village of Vilna, Alberta be designated as a **Provincial Historic Resource** under Section 20 of the Historical Resources Act, RSA 2000 cH-9.

The reasons for the designation are as follows: The heritage value of the Vilna Pool Hall and Barbershop lies in its representation of a typical kind of building found in Alberta's early twentieth-century rural villages. It also possesses heritage value as an excellent example of a vernacular style of boomtown architecture.

Like many rural communities, Vilna was responsible for providing a variety of services to a large agricultural hinterland. As a pool hall and barbershop from 1920 until 1996 (and a confectionary until the 1960s), the Pool Hall was a gathering place for men from the surrounding district.

The building is also an excellent example of the commercial Boomtown style used for a variety of small businesses in rural western communities. As a purpose-built structure that served its original function for eight decades, it retained a variety of artifacts related to its historic use and possesses excellent integrity. It is the oldest building in town and part of a grouping of similar small businesses in the village centre.

It is therefore considered that the preservation and protection of the resource is in the public interest.

Notice is hereby given that sixty days from the date of service of this Notice and its publication in Alberta Gazette, the Minister of Culture and Community Spirit intends to make an Order that the site known as the:

Campbell Block, together with the land legally described as:

Plan RN1 (I), Block three (3), Lots one (1), two (2) and the south half of lot three (3), excepting thereout: all that portion described as follows: Commencing at the south east corner of said lot one (1) thence northerly along the eastern boundaries of lots one (1), two (2) and three (3) one hundred and fifteen (115) feet, thence westerly and parallel to the southern boundaries of said lots thirty (30) feet, thence southerly and parallel to said eastern boundaries to the southern boundary of said lot one (1), thence easterly along said southern boundary to the point of commencement excepting thereout all mines and minerals

and municipally located at 4918 and 4922 – 50 Avenue in Lacombe, Alberta be designated as a **Provincial Historic Resource** under Section 20 of the Historical Resources Act, RSA 2000 cH-9.

The reasons for the designation are as follows: The heritage value of the Campbell Block lies in its excellent representation of 1920s commercial architecture in Alberta.

The Campbell Block was erected in 1920 in the heart of downtown Lacombe and initially served the community as a department store. Hailed by the local newspaper as a “modern” business block which would greatly enhance the aesthetics of Lacombe’s main street, the building featured robust red-brick construction, large second-storey “Chicago” windows, and decorative elements like a bracketed cornice and bold sign band. The Campbell Block’s design echoed that of commercial buildings erected during the pre-First World War boom years in Lacombe and elsewhere, but was set apart by its scale, its modest detailing, and its distinctive upper windows. The solidity and elegant simplicity of the building also embodied the entrepreneurial optimism and civic prominence of its owner, A. M. (Sandy) Campbell, a leading merchant and political figure in early twentieth-century Lacombe. Prominently situated on two and a half lots in downtown Lacombe, the Campbell Building is one of the finest extant examples of 1920s commercial architecture and contributes to the physical and visual continuity of one Alberta’s best-preserved historic streetscapes.

It is therefore considered that the preservation and protection of the resource is in the public interest.

Notice is hereby given that sixty days from the date of service of this Notice and its publication in Alberta Gazette, the Minister of Culture and Community Spirit intends to make an Order that the resource known as:

Steam Locomotive 6060

and municipally located in the Town of Stettler, Alberta be designated as a **Provincial Historic Resource** under Section 20 of the Historical Resources Act, RSA 2000 cH-9.

The reasons for the designation are as follows: The heritage value of Steam Locomotive 6060 lies in its status as an excellent example of a late-era steam locomotive.

Built in 1944, Steam Locomotive 6060 is a Canadian National Railways (CNR) U-1-f Mountain class locomotive. These locomotives were a variation of a type CNR had been using since the 1920s. When CNR was formed in 1923 it inherited rail lines of considerable variety, both of construction and condition, and an outdated and underpowered fleet of locomotives. CNR purchased new locomotives which were light yet powerful. One type was the Mountain class, which had been developed in the United States for use on heavily travelled, mountainous railroads. One of the Mountains' distinguishing features is their 4-8-2 wheel configuration, meaning they have four non-powered leading wheels for stability and steering, eight large driving wheels for motive power, and two non-powered trailing wheels for support and stability. Although they were slightly less powerful than CNR's other new locomotives, the Mountains were shorter and, therefore, more versatile, able to operate on winding and mountainous routes other locomotives could not navigate. CNR received its first Mountain locomotives, the U-1-a design, in 1923.

The start of the Second World War required increasing numbers of passengers, troops, prisoners of war, and massive amounts of freight to be shipped expeditiously across the country. CNR responded to this surging demand by ordering a new variation of Mountain class locomotive, the U-1-f class. What set these new locomotives apart visually from their predecessors was the conical front to its smoke box, a feature that earned them the moniker "Bullet-Nosed Betty." In 1944, the 6060 (serial no. 72757) came off the assembly line at the Montreal Locomotive Works. Built during wartime, efficiency was paramount during its design and construction. This focus on efficiency is evidenced by numerous aspects of its design. Its one piece cast metal frame required less labour to produce. Its internal workings were streamlined, which gave it better fuel efficiency. A thermic siphon distributed water evenly throughout the boiler for more efficient heating. Its tender, which is the car immediately following the locomotive that stores its water and fuel supply, was of a cylindrical design. Commonly called a Vanderbilt tender, it is lighter than, create less drag than and uses less steel than the standard rectangular tenders. CNR was one of the few major North American railroads to adopt these tenders. For improved traction the 6060 also has a complex suspension system and Alco lateral motion devices,

which allow certain sets of wheels to move sideways to compensate for changes in track width.

Initially used on short freight runs in central Canada, the 6060 was assigned in 1945 to the prestigious continent-wide passenger excursions. Its sleek design, emphasized by its conical nose and running boards, and its capacity to travel great distances without being spelled off, made it ideal for passenger traffic. In the mid-1950s, it was converted from coal to fuel oil. Retired from active service in the early 1960s, it was placed on static display in Jasper in 1962. In the early 1970s, it was returned to active service for tourist excursions in Ontario. In 1980, CNR presented the 6060 to the people of Alberta to mark the province's seventy-fifth anniversary; it has subsequently been known as the "Spirit of Alberta." The locomotive has recently been restored and is used on tourist excursions in Central Alberta. The U-1-f Mountain class locomotives were the last steam locomotives purchased by CNR before the company converted to diesel power. Of the 20 that were built three remain. In 2008, the 6060 was the only one in Alberta and the only one in operational condition.

It is therefore considered that the preservation and protection of the resource is in the public interest.

Notice of Adjustment to the Minor Injury Amount

(Insurance Act)

Pursuant to the *Minor Injury Regulation*, the maximum amount awarded for minor injuries is adjusted to \$4,504 and is applicable to minor injuries caused in motor vehicle accidents occurring in Alberta, on or after January 1, 2009.

The *Minor Injury Regulation* was struck down by Associate Chief Justice Wittmann of the Alberta Court of Queen's Bench on February 8, 2008. It was found to be inconsistent with the *Constitution Act*, 1982 and is of no force or effect. The government appealed the decision.

If Justice Wittman's decision to strike down the *Minor Injury Regulation* is overturned, then this notice will be deemed to be in effect.

The following Appendix sets out the method of calculating the adjustment to the minor injury amount.

Dated at Edmonton this 20th day of January, 2009.

Dennis Gartner
Superintendent of Insurance.

Ref: *Insurance Act*
Minor Injury Regulation

APPENDIX

The maximum amount recoverable as damages for non-pecuniary losses for all minor injuries sustained by a claimant as a result of an accident occurring during the 2009 calendar year is \$4,504.

This amount is based on the annual change in the Alberta Consumer Price Index (CPI), and is calculated using the following formulas:

- (a) The annual change in the Alberta CPI was calculated to one-tenth of a percentage point using the formula $X = (A-B) / B$ where:

X is the annual change in the Alberta CPI;

A is the sum of the 12 individual monthly CPI indexes for the 12-month period ending on September 30, 2008;

B is the sum of the 12 individual monthly CPI indexes for the 12-month period ending on September 30, 2007.

- (b) The result in (a) is multiplied by the 2008 minor injury amount and rounded to the nearest whole dollar to derive the increase in the minor injury amount for 2009.
- (c) The increase in (b) is added to the 2008 minor injury amount and rounded to the nearest whole dollar to establish the 2009 minor injury amount.

The following data was used in the calculation:

Month	Alberta Consumer Price Index	Month	Alberta Consumer Price Index
Oct-06	113.0	Oct-07	118.6
Nov-06	113.7	Nov-07	119.1
Dec-06	114.2	Dec-07	118.9
Jan-07	114.7	Jan-08	118.8
Feb-07	115.0	Feb-08	119.0
Mar-07	116.4	Mar-08	119.8
Apr-07	117.5	Apr-08	121.3
May-07	117.8	May-08	122.2
Jun-07	118.8	Jun-08	124.0
Jul-07	119.1	Jul-08	123.3
Aug-07	119.3	Aug-08	124.1
Sep-07	119.4	Sep-08	122.8
Summation (B)	1398.9	Summation (A)	1451.9
2005 basket, monthly (2002=100)			

Based on the above, the annual change in the Alberta CPI, rounded to 1/10th of a percentage point, is 0.038 or 3.8%. The increase in the minor injury amount for 2009 is 3.8% of the 2008 minor injury amount of \$4,339 rounded to the nearest whole dollar, or \$165. Accordingly, the 2009 minor injury amount is set at \$4,504.
