(o) ***by replacing Items 4 and 5 of Part I with the following:***

Item 4: Risks

(1) Under the heading "How risky is it?", state the following:

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

(2) Under the sub-heading "Risk rating",

(a) using the investment risk classification methodology adopted by the manager of the mutual fund, identify the mutual fund's investment risk level on the following risk scale:

Low	Low to medium	Medium	Medium to high	High

(b) unless the mutual fund is a newly established mutual fund, include an introduction to the risk scale which states the following:

[Insert name of manager of the mutual fund] has rated the volatility of this fund as [insert investment risk level identified in paragraph (a) in bold type].

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

(c) for a newly established mutual fund, include an introduction to the risk scale which states the following:

[Insert name of manager of the mutual fund] has rated the volatility of this fund as [insert investment risk level identified in paragraph (a) in bold type].

Because this is a new fund, the risk rating is only an estimate by [insert name of manager of the mutual fund]. Generally, the rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

(d) following the risk scale, state using wording substantially similar to the following:

For more information about the risk rating and specific risks that can affect the fund's returns, see the [insert cross-reference to the appropriate section of the mutual fund's simplified prospectus] section of the fund's simplified prospectus.

(3) Under the sub-heading "No guarantees", state using wording substantially similar to the following:

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.

INSTRUCTIONS:

(*1*) *Based upon the investment risk classification methodology adopted by the manager of the mutual fund, identify where the mutual fund fits on the continuum of investment risk levels by showing the full investment risk scale set out in Item 4(2)(a) and highlighting the applicable category on the scale. Consideration should be given to ensure that the highlighted investment risk rating is easily identifiable.*

Item 5: Past Performance

(1) Under the heading "How has the fund performed?", include an introduction using wording substantially similar to the following:

This section tells you how [name of class/series of securities described in the fund facts document] [units/shares] of the fund have performed over the past [insert number of calendar years shown in the bar chart required under paragraph (2)(a)] years. Returns are after expenses have been deducted. These expenses reduce the fund's returns.

(2) Under the sub-heading "Year-by-year returns",

(a) provide a bar chart that shows the annual total return of the mutual fund, in chronological order with the most recent year on the right of the bar chart, for the lesser of

(i) each of the 10 most recently completed calendar years, and

(ii) each of the completed calendar years in which the mutual fund has been in existence and which the mutual fund was a reporting issuer; and

(b) include an introduction to the bar chart using wording substantially similar to the following:

This chart shows how [name of class/series of securities described in the fund facts document] [units/shares] of the fund performed in each of the past [insert number of calendar years shown in the bar chart required under paragraph (a)]. The fund dropped in value in [for the particular years shown in the bar chart required under paragraph (a), insert the number of years in which the value of the mutual fund dropped] of the [insert number of calendar years shown in the bar chart required in paragraph (a)] years. The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

(3) Under the sub-heading “Best and worst 3-month returns”,

(a) provide information for the period covered in the bar chart required under paragraph (2)(a) in the form of the following table:

	Return	**3 months ending**	**If you invested $1,000 at the beginning of the period**
Best return	(see instruction 8)	(see instruction 10)	Your investment would [rise/drop] to (see instruction 12).
Worst return	(see instruction 9)	(see instruction 11)	Your investment would [rise/drop] to (see instruction 13).

(b) include an introduction to the table using wording substantially similar to the following:

This table shows the best and worst returns for the [name of class/series of securities described in the fund facts document] [units/shares] of the fund in a 3-month period over the past [insert number of calendar years shown in the bar chart required under paragraph (2)(a)]. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

(4) Under the sub-heading “Average return”, show the following:

(a) the final value of a hypothetical $1000 investment in the mutual fund as at the end of the period that ends within 60 days before the date of the fund facts document and consists of the lesser of

(i) 10 years, or

(ii) the time since inception of the mutual fund;

(b) the annual compounded rate of return that equates the hypothetical $1000 investment to the final value.

INSTRUCTIONS:

(1) In responding to the requirements of this Item, a mutual fund must comply with the relevant sections of Part 15 of National Instrument 81-102 Mutual Funds as if those sections applied to a fund facts document.

(2) Use a linear scale for each axis of the bar chart required by this Item.

(3) The x-axis and y-axis for the bar chart required by this Item must intersect at zero.

(4) A mutual fund that distributes different classes or series of securities that are referable to the same portfolio of assets must show performance data related only to the specific class or series of securities being described in the fund facts document.

(5) If the information required to be disclosed under this Item is not reasonably available, include the required sub-headings and provide a brief statement explaining why the required information is not available. Information relating to year-by-year returns in the bar chart will generally not be available for a mutual fund that has been distributing securities under a simplified prospectus for less than one calendar year. Information under "Best and worst 3-month returns" and "Average return" will generally not be available for a mutual fund that has been distributing securities under a simplified prospectus for less than 12 consecutive months.

(6) The dollar amounts shown under this Item may be rounded up to the nearest dollar.

(7) The percentage amounts shown under this Item may be rounded to one decimal place.

(8) Show the best rolling 3-month return as at the end of the period that ends within 60 days before the date of the fund facts document.

(9) Show the worst rolling 3-month return as at the end of the period that ends within 60 days before the date of the fund facts document.

(10) Insert the end date for the best 3-month return period.

(11) Insert the end date for the worst 3-month return period.

(12) Insert the final value that would equate with a hypothetical $1000 investment for the best 3-month return period shown in the table.

*(13) Insert the final value that would equate with a hypothetical $1000 investment for the worst 3-month return period shown in the table.****;***

Under the heading "How much does it cost?", state the following:

The following tables show the fees and expenses you could pay to buy, own and sell [name of the class/series of securities described in the fund facts document] [units/shares] of the fund. The fees and expenses – including any commissions – can vary among [classes/series] of a fund and among funds. The trailing commission is an ongoing commission. It is paid for as long as you own the fund. It is for the services and advice that your representative and their firm provide to you.

[Insert name of fund manager] pays the trailing commission to your representative's firm. It is paid from the fund's management fee and is based on the value of your investment. The rate depends on the sales charge option you choose.
