(i) after referring to a price quotation on a marketplace, if one is published for the security, using the last bid price in the case of a long security and the last ask price in the case of a short security, as shown on a consolidated pricing list or exchange quotation sheet as of the close of business on the relevant date or last trading day before the relevant date, and after making any adjustments considered by the registered firm to be necessary to accurately reflect the market value;

(ii) if no reliable price for the security is quoted on a marketplace, after referring to a published market report or inter-dealer quotation sheet, on the relevant date or last trading day before the relevant date, and after making any adjustments considered by the registered firm to be necessary to accurately reflect the market value;

(iii) if the market value for the security cannot be reasonably determined in accordance with subparagraphs (i) or (ii), after applying the policy of the registered firm for determining market value, which must include procedures to assess the reliability of valuation inputs and assumptions and provide for

(A) the use of inputs that are observable, and

(B) the use of unobservable inputs and assumptions, if observable inputs are not reasonably available.
