Alberta Climate Change Office

Specified Gas Reporting Regulation reporting threshold reduced to 10,000 tonnes CO₂ equivalent beginning with the 2017 reporting period.

The Alberta Climate Change Office is lowering the specified gas emissions reporting threshold to 10,000 tonnes CO₂ equivalent per year.

Environment and Climate Change Canada, through the Canada Gazette, has indicated they are lowering the reporting threshold of the federal greenhouse gas reporting program to 10,000 tonnes of CO₂ equivalent starting for the 2017 reporting period. As a result, Alberta facilities will be required to report their greenhouse gas emissions under the federal program. In order to align and collect the reported emissions information Alberta is aligning with Environment and Climate Change Canada's reporting threshold.

Facilities that exceed 10,000 tonnes of CO₂ equivalent in 2017 must report their 2017 emissions on or before June 1, 2018.

Facilities that emit more than 10,000 tonnes of CO₂ equivalent are required to submit a specified gas report to the Alberta Climate Change Office via Environment and Climate Change Canada's Single Window Information Management (SWIM) system. The specified gas report must be submitted in accordance with the requirements set out in the Specified Gas Reporting Regulation and the Specified Gas Reporting Standard. The reporting information for the 2017 period must be submitted by no later than June 1, 2018.

Currently, the Specified Gas Reporting Standard is posted for 30 day public comment period. Please review the draft document at the web link below and provide comment by January 31, 2018.
